Distracting Websites: how it is put together

A single-file Python tool, tool.py, that judges whether a website is productive for a task you describe. It asks what you want to achieve, uses the Gemini API to ask follow-up que.

sketched from the files

Distracting Websites: the run, step by step

If a step fails, the hopest run says so and stops.

traced, not guessed, GK

Product map: what Distracting Websites is for

WHAT IT IS

A single-file Python tool, tool.py, that judges whether a website is productive for a task you describe. It asks what you want to achieve, uses the Gemini API to ask follow-up que.

WHAT GOES IN

The files at the top of the tree: tool.py, README.md, requirements.txt.

WHAT COMES OUT

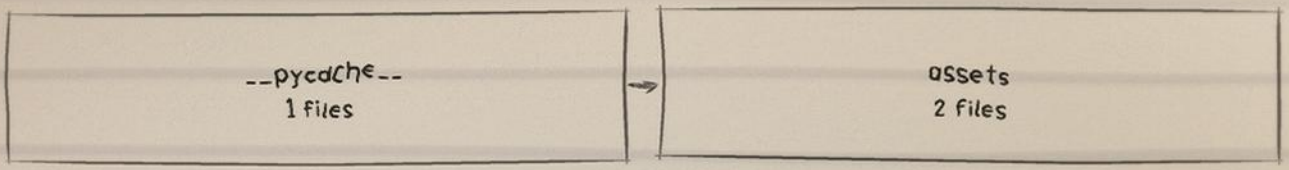

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand,

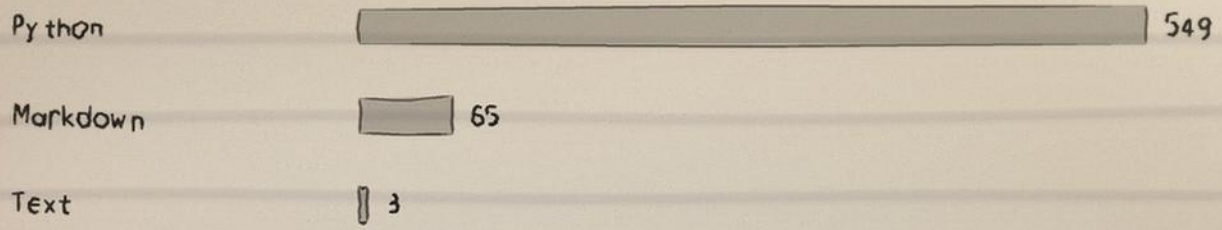

Distracting Websites: the parts and their jobs

Each part is a folder or a file that is really in the tree.
If a part is only a name in the README, it is not drawn here.

Distracting Websites in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

6 files in the tree.
71 commits, first 2021-08-03, last 2026-10-30, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

Distracting Websites: schematic of the apparatus

the system as a machine: parts, flow, and measurements

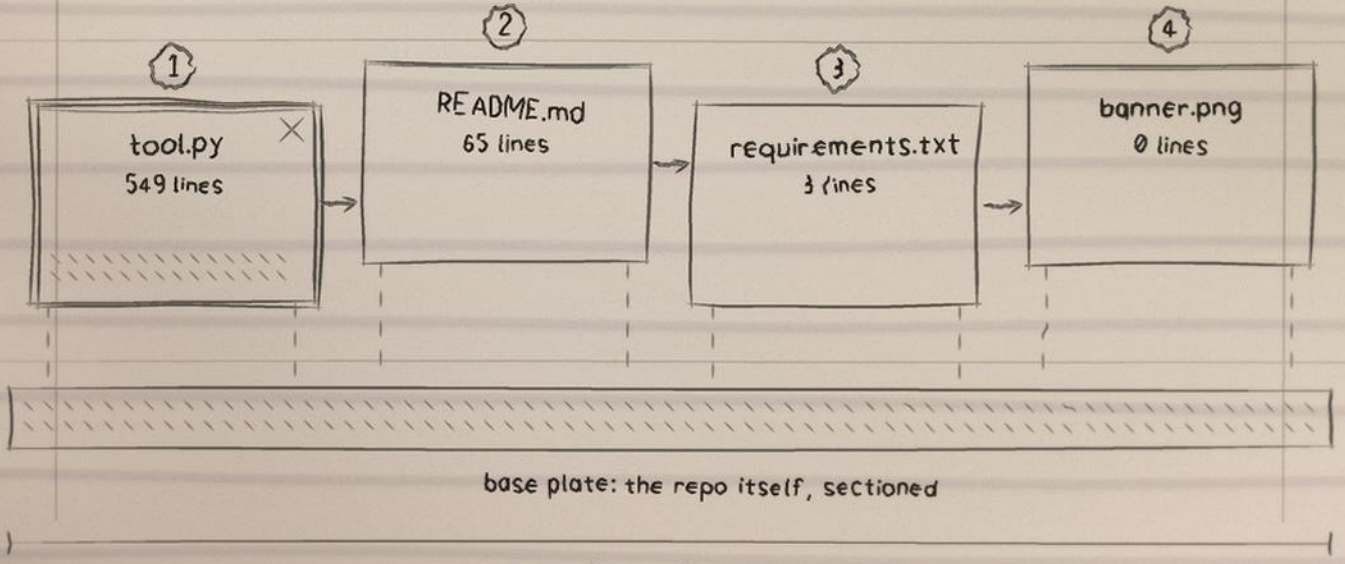

construction lines left in, as drawn

parts list

1. tool.py
2. README.md
3. requirements.txt
4. banner.png

in flow order, first to last

housed in: __pycache__, assets

measured in the code: cap 10 (tool.py)

turns of the crank so far: 71 commits, 2021-08-03 to 2026-10-30

measured and sketched, GK
